Adaptor kit for the CH7280

* Not included in this product, but separately sold.
(Available for different manufacturer and model of electric drivers)

◆ Setting up the specific adaptor kit ◆
Method to mount the adaptor kit will vary depending on the manufacturer and model of your screwdriver. Refer to "How to mount by screwdriver type" that comes with the specific adaptor kit.

◆ Attaching and detaching the genuine bit (Other than for hex head) ◆

Attaching
1. Pull and hold sleeve toward the electric driver.
2. Insert the bit into the socket and release the sleeve back into place.
3. Make sure the bit is tight and hold in position.

Detaching
1. Pull and hold sleeve toward the electric driver.
2. Draw out the bit.
3. The CH7280 genuine bit (Other than for hex head), which comes with the specific adaptor kit has a double-end type bit. When one side has worn out, use the other side. Replace the bit when both the heads have worn out.

◆ Mounting and dismounting the attachment ◆

Mounting
1. Lift up the hook
2. Insert the electric driver's adaptor into this attachment.
3. Make sure the bit fits into the cylindrical tube
4. Tilt down the hook.

Dismounting
1. Lift up the hook
2. Remove the electric driver's adaptor out of this attachment.
◆ Attaching and detaching the genuine bit (for HEX head)◆

**Attaching**
1. After mounting the attachment, hold the attachment vertically.
2. Push down the rubber cap.
3. Insert the bit into the attachment.
4. Pull the lever and push the bit.
5. Release the lever.

**Detaching**
1. Hold the attachment vertically.
2. Push down the rubber cap.
3. Pull the lever and draw out the bit.

◆ Adjusting the screw-driving depth◆

1. Turn the screw depth adjusting dial upward to achieve more depth.
2. Turn the screw depth adjusting dial downward to achieve less depth.
   ※ Four clicks make an increment of 1 mm.
   [Adjustment other than HEX head]
   Adjust the screw-driving depth with screw depth adjusting dial.
   [Impact driver]
   Adjust the depth with no gaps between the head of screw and application.
   The impact driver’s clutch is activated to completely tighten up the screw.
   [Screw driver]
   Adjust the depth to have no gaps between the head of screw and application.
   Excessive depth adjustment may cause screw idles.

◆ Attaching and detaching the specific collated screws◆

**Attaching**
1. Place the VISROPE STRIPS in the direction shown in the figure

**Detaching**
2. Hold the attachment in one hand meanwhile pressing onto the collated screw take-out latch A & B simultaneously
3. Remove/ pull out the VISROPE STRIPS.

◆ Driving the screws◆

1. Push the electric driver’s trigger switch to the ON position.
2. Press the lock button for driver to run continuously.
3. Apply and push the tool perpendicularly onto the desired surface to screw on.
CH7280 stops the end of stroke. The electric driver’s clutch is activated to completely tighten up the screw.

◆ Troubleshooting◆

1. Two screws fed at once, or screw jammed and stuck.
2. Hold the attachment on one hand meanwhile pressing onto the collated screw removal latch A & B.
3. Lower the Feed Lever.
4. Make sure the screws slide smoothly, and pull out the VISROPE STRIPS.
1. After each use, be sure to clean up power tool. Powder plaster, dust and dirt stuck on the tool may cause trouble or issue for next operation.

2. To wipe and clean power tool, use dry cloth or neutral detergent-soaked cloth. Do not use gasoline, thinner or similar solution to prevent damage in the power tool. Never wash power tool with water to avoid any rust or tool malfunction.

3. The bit of the adaptor kit is consumable parts. If the bit on both ends have worn out, immediately replace with a new one. *Worn-out bit may cause poor tightening or damage to the screw head.

4. Store power tool in a dry, cool place. Keep it outreach of children and untrained personnel. Place tool on a flat spot to prevent any falling damage.

5. Do not disassemble and repair the power tool yourself. For repairs, contact your dealer.

Vislider® Auto Feed Screwdriving Attachment

Product Registration: Online OR Mail-in Warranty Card to Service Centre

This is your Muro product registration card. Proper registration may serve as proof of purchase in case original receipt is lost or misplaced. Please fill out registration card and return by mail OR register online at www.muro.com. Muro North America Inc. provide a 6 months warranty after the date of purchase by the end-user against defective workmanship or material. This warranty does not cover defects or damage due to misuse, abuse, or normal wear and tear. Warranty is void if any screws other than VISROPE (Muro collated screw) are used. For any issue or trouble arise, product must be returned to place of purchase. Detailed warranty information printed on last page of this booklet.

In no event shall Muro be responsible for any direct, indirect, special or consequential damages, even if Muro is informed about their possible existence, including any loss or damage arising out of, connected with, or resulting from the manufacture, sale, delivery, resale, repair, replacement, use, misuse, or performance of any product.

Some states do not allow the exclusion or limitation of incidental or consequential damages, so that the above may not apply to you.

The law of some jurisdictions limit or do not allow the disclaimer of consequential damages. If the laws of such jurisdiction apply to any claim by or against the Seller, the limitation and disclaimers contained here shall be to the greatest extent permitted by law.
